

VITO DEPALO

Landscape Architect

London - UK
vitodepalo@gmail.com

As a landscape architect for over 35 years, I have worked in all fields of landscape architecture, from small-scale design to urban planning. I approach each project through its various phases, focusing on client relations with utmost care to meet their needs and preferences.

I managed the public green space sector of the Municipality of Siena for about 10 years and currently work as a co-founder of the Citèra studio alongside architect Riccardina Burdo.

My recent professional experience in London at a renowned garden design studio has further refined my architectural detailing skills and enriched my botanical choices, engaging with an international, high-level market.

My insatiable quest for quality and form leads me to embrace innovations in technologies related to the design and execution of green works.

I have had the honour of contributing two projects to the community, as I believe in the social responsibility inherent in garden design.

PROFESSIONAL EXPERIENCE

Citèra Studio	Co-founder of Citèra Landscape Architecture Studio with architect Riccardina Burdo. Many projects completed for private clients and public administrations.
2021 – present	
2008 – 2014
